

CONCRETE SURFACING

FAQS

WHY SHOULD YOU COAT OR RESURFACE YOUR CONCRETE FLOORING?

1

**HIGHLY
DURABLE**

2

**LOW
MAINTENANCE**

3

**LONG
LASTING**

4

**SLIP
RESISTANT**

5

**WEIGHT
BEARING**

6

**TIMELESS
APPEAL**

For industrial spaces, whether it's a warehouse, grocery store, healthcare facility, or industrial kitchen, durability is key, especially when it comes to flooring. Choosing an epoxy, urethane, polish, or stain coating on a concrete surface is an excellent choice to meet the unique demands of industrial areas. Not only does it provide a sleek, polished look for public spaces, but it can also withstand the weight of heavy loads and disturbance caused by frequent foot traffic. The low maintenance and easy to clean nature of these surfaces allows for this product to last far longer than other flooring options.

Sometimes, all that is needed is a little refresh to get concrete floors ready to receive a special treatment. Our team has perfected their floor prep service to ensure that however concrete is serviced, it has the best chance at perfection.

WHAT SERVICES DO WE PROVIDE?

1 EPOXY

This tends to be the best option for a more decorative look. The various colors, patterns, and decal options make it more adaptable to reflect your brand or business.

- Metallic Epoxy
- Decals
- Epoxy Cove
- Decorative Flake Epoxy
- Line Striping
- Quartz Epoxy

2 URETHANE

The perfect option for spaces that require sterilization, such as medical facilities or commercial kitchens, due to its non-porous nature. Oftentimes, sterile spaces require the coating to continue beyond the floors and onto the base of the wall to prevent bacteria from seeping into the ground, in that case, this is the best concrete coating choice. It can also withstand higher temperatures.

3 POLISHED CONCRETE SYSTEM

From a matte to a high gloss finish, the choice is yours. When maintained properly with burnishing and other cleaning methods, it can last forever, making it an extremely popular option for places with heavy foot traffic. Additionally, you can include lettering, though the coloring will be less vibrant than with epoxy.

WHAT SERVICES DO WE PROVIDE?

4 SEALER

Not a great cosmetic solution, but more of a protective measure for concrete. Often used in spaces like an electric room where the aesthetic doesn't matter. Easily cleaned, cost effective, and dust proof, this solution is an excellent option for those who simply want to prevent any concrete damage.

5 STAINED CONCRETE

If a concrete floor is patched, there will be a discrepancy in color from the original flooring to the patching. Staining is the solution to help it become one cohesive color.

6 FLOOR PREP SERVICES

From patching holes to removing adhesive and grout from previous flooring, our team has a solution to help get your concrete ready for the next step.

- Floor Leveling
- Joint & Crack Refill
- Floor Prep
- Moisture Remediation
- Joint & Crack Repair

7 OTHER SERVICES

Looking for a different solution for your concrete? Just ask, or check out our other services.

- Secondary Containment
- Decorative Quartz
- Line Striping
- Moisture Remediation
- Market Ready
- Leveling

WHICH METHOD IS FREQUENTLY USED IN COMMON SPACES?

While it can be challenging to decide which treatment to use on your space, here are common pairings we see frequently with our other clients. If you don't see your project type, or have unique requests, please consult our team of experts who will be able to direct you.

Salons

WHAT'S OUR PROCESS

1 INVITE US TO BID

Fill out our “Request a Bid” Form or call us at (847) 541-4848. We will contact you shortly to ask a few more questions about your project.

2 ASSESS THE MEASUREMENTS

We'll then prepare the take-offs of the plans in which we go through each material to determine what needs to be measured and price. This will help provide everyone with an appropriate scope of work.

3 DETERMINE APPROPRIATE FINISH

Every project is unique. For that reason, we take extra steps to ensure you're selecting the appropriate finish for your space. We assess the different elements that will interact with your space on a daily basis to ensure the final selection will be sustainable.

4 WE PROVIDE AN ESTIMATE

After all appropriate measures have been taken, we provide an estimated bid for you to consider and compare to other competitors. While our bids are thorough, extraneous costs, such as floor prep and joint fill, may be determined on site.

WHO WOULD YOU BE WORKING WITH?

Our close knit team has been in the concrete coating and resurfacing business for over 15 years, serving the greater Chicagoland area. Guided by our unwavering care for our clients, we pride ourselves on never cutting corners. We will work tireless hours and take extra precautions to ensure that your job is done right the first time.

We know your project is unique, and we will treat it as such. Our team will work with your schedule and your budget to help create the space required for your business to thrive.

At the end of the day, you'd be working with a team who not only believes in the product we're installing, but who believes in the relationships we develop along the way.

“ I have been working with Tim and his crew for over 14 years. Commitment to quality and timeliness is their number one priority. They have a hard work ethic and a ‘whatever it takes’ mentality. They will always be my epoxy flooring contractor and I would recommend them to any other general contractor looking for epoxy flooring. ”
